

## 2001A Bond

# East Cabrillo Boulevard Sidewalks \$3,100,000

---

### PROJECT DESCRIPTION:

Improvements anticipated for this mile-long promenade between Stearns Wharf to Milpas Street include new concrete sidewalks and landscaping enhancements. The sidewalk receives heavy use as it is flanked by tourism-related businesses, hotels and recreational public parks. East Cabrillo boulevard was a significant element in the 1924 Major Traffic Street Plan, Boulevard and Park System prepared by Charles Cheney and the Olmsted Brothers landscape firm. The plan provided guidance for the development of the recreational beachfront area. The area extending from State Street eastward to Highway 101 is now a State Historic District and provides protection for this historic element.

### PROJECT MANAGER:

Marck Aguilar,  
Redevelopment Specialist

---

### NOTES:

Funds have been expended for an historical study and preliminary design. The current account balance is approximately \$2,906,000.
